Amendments to the claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

- 1. (Currently amended): A white, biaxially oriented film with a thickness in the range from 10 to 500 µm and a whiteness of 90 % or more, whose main constituent is at least one crystallizable thermoplastic and which comprises at least one rutil-type titanium dioxide as white pigment and at least one optical brightener and at least one soluble blue dve, with or without other additives, and has also at least one other functionality.
- 2. (Original): The film as claimed in claim 1, wherein the crystallizable thermoplastic is a polyethylene terephthalate, polybutylene terephthalate, polyethylene naphthalate, bibenzoyl-modified polyethylene terephthalate, or a mixture of these.
- 3. (Original): The film as claimed in claim 1, wherein the concentration of the white pigment present is in the range from 2.0 to 25.0% by weight based on the weight of the thermoplastic.
- 4. (Original): The film as claimed in in claim 1, wherein the optical brightener present comprises at least one benzoxazole derivative, triazine derivative, phenylcoumarin derivative, or bisstearylbiphenyl derivative, in amounts of from 10 to 50 000 ppm based on the weight of the crystallizable thermoplastic.
- 5. (Currently amended): The film as claimed in in claim 1, which has gained at least one other functionality by being provided with a flame retardant and/or with UV stabilizers (UV absorbers), and/or has been coated so as to be sealable, and/or has been coated on one or both surfaces, and/or has been corona-treated on one or both sides[, and has been provided with a soluble dye alongside with the optical brightener].
- 6. (Original): The film as claimed in claim 5, wherein the concentration of the UV absorber is in the range from 0.01 to 5.0% by weight, and the concentration of the soluble dye is in the range from 10 to 10 000 ppm.
 - 7. (Original): The film as claimed in claim 5, wherein the UV absorbers present

are 2-hydroxybenzophenones, 2-hydroxybenzotriazoles, organonickel compounds, salicylic esters, cinnamic ester derivatives, resorcinol monobenzoates, oxanilides, hydroxybenzoic esters, sterically hindered amines, or triazines, preferably 2-hydroxybenzotriazoles or triazines, or in particular 2-(4,6-diphenyl-1,3,5-triazin-2-yl)-5-hexyloxyphenol or 2,2'-methylenebis(6-(2H-benzotriazol-2-yl)-4-(1,1,2,2-tetramethylpropyl)phenol).

- 8. (Original): The film as claimed in in claim 5, wherein the flame retardant present is an organic phosphorus compound.
- 9. (Original): The film as claimed in in claim 8, wherein the organic phosphorus compound is a carboxyphosphinic acid or anhydride thereof.
- 10. (Currently amended): The film as claimed in in claim 8, wherein the organic phosphorus compound is $bis(5-ethyl-2-methyl-2-oxo-2\lambda^5-[1,3,2]dioxaphosphinan-5-ylmethyl)-methanephosphonate.$
- 11. (Original): The film as claimed in in claim 1, wherein a hydrolysis stabilizer is present, in the form of phenolic stabilizers, alkali metal/alkaline earth metal stearates, and/or alkali metal/alkaline earth metal carbonates, in amounts of from 0.01 to 1.0% by weight.
- 12. (Original): The film as claimed in in claim 11, wherein the phenolic stabilizer in is present in amounts of from 0.05 to 0.6% by weight and having a molar mass above 500 g/mol.
 - (Original): The film as claimed in claim 1, wherein regrind is present.
 - 14. (Withdrawn)
 - 15. (Withdrawn)
 - 16. (Withdrawn)
 - 17. (Withdrawn)
 - 18. (Withdrawn)

- 19. (New): The film as claimed in claim 1, wherein the dye is present in an amount of from 10 to 10,000 ppm, based on the weight of the crystallizable thermoplastics.
- 20. (New): The film as claimed in claim 19, wherein the blue dye is Sudan Blue 2.
- 21. (New): The film as claimed in claim 1, wherein the crystallizable thermoplastic has a polyethylene glycol content of 1 % by weight or more and the film is thermoformable.
